PROFESSIONAL SUMMARY

Computer Science and Engineering student (graduating May 2027) with hands-on experience building end-to-end ETL pipelines, data warehousing solutions, and BI dashboards using Python, SQL, PostgreSQL, and Apache Airflow. Skilled in data cleaning, workflow automation, and transforming raw data into business-ready insights. Strong foundation in data structures, algorithms, and database systems, with a passion for solving complex problems through scalable data solutions. A quick learner with strong analytical thinking, attention to detail, effective communication, adaptability, and a collaborative mindset, committed to delivering reliable and impactful results.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, C, JavaScript, SQL, HTML5, CSS3
- **Data Engineering & Databases:** PostgreSQL, MySQL, Apache Airflow, Apache Hive, Apache HBase, Apache Cassandra, Hadoop, SQLAlchemy, ETL Pipelines, Data Warehousing
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Microsoft Excel
- **Platforms & Tools:** Git, GitHub, Docker, VS Code, AutoCAD, Jupyter Notebook, Streamlit
- **AI & Generative AI:** Prompt Engineering, Prompt Optimization, AI-Assisted Development, AI Agent development

PROJECTS

SkyMetrics – Live Flight Analytics Dashboard | [GitHub](#) Jul 2026

- Developed a real-time flight analytics dashboard to monitor global aviation data, visualizing 10,000+ live flight records through interactive KPI cards.
- Engineered automated ETL pipelines for ingesting, cleaning, transforming, and analyzing live flight data, reducing manual processing time.
- Designed analytical reports and dashboards with 15+ KPIs for airline performance, airport traffic insights, route analytics, and delay trends.
- Implemented responsive visualizations using interactive charts and filters to optimize business intelligence and decision-making.
- **Tech Stack:** Python • SQL • PostgreSQL • Apache Airflow • Streamlit • Plotly • Pandas • REST APIs

DataflowX – Complete End-to-End ETL Pipeline | [GitHub](#) Jun 2026

- Engineered an automated end-to-end ETL pipeline processing raw Reddit data, enhancing data retrieval efficiency by 30%.
- Integrated Reddit API via PRAW to extract top dataset posts, orchestrating workflows with Apache Airflow for 24/7 reliability.
- Optimized data transformations using Pandas before loading structured datasets into an AWS S3 data lake.
- Automated data querying with Amazon Athena, significantly reducing data access latency for analytics tasks.
- **Tech Stack:** Python, Apache Airflow, Pandas, PRAW (Reddit API), AWS S3, Amazon Athena

Car Price Prediction | [GitHub](#) Dec 2025

- Built a machine learning model to predict second-hand car prices, evaluating 10+ features such as age, mileage, and specifications.
- Implemented a user-interactive system to collect preferences, successfully suggesting matching vehicles with high accuracy.
- Applied regression techniques to establish accurate price ranges, enabling 20% faster decision-making for end users.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

TRAINING

Six Weeks Summer Training - Fundamentals of Data Structures | [GitHub](#) Jul 2025

Lovely Professional University

- Completed intensive training on Data Structures, Algorithm Analysis, and Complexity Analysis.
- Implemented core data structures including Arrays, Linked Lists, Stacks, Queues, Trees, and Trie.
- Strengthened problem-solving, software design, testing, and documentation skills.

Community Development Project (CDP) - Rural Technology & Digital Literacy | [GitHub](#) Jul 2024

- Collaborated with The STEARS NGO to conduct a community outreach program at Sheikh-ul-Alam Public School (SAPS), Subhanpura.
- Delivered interactive sessions on programming fundamentals, Artificial Intelligence, and technology awareness.
- Organized critical-thinking activities to enhance problem-solving, teamwork, and creativity.

CERTIFICATIONS

Introduction to Cloud Computing

[Coursera](#)

Computational Theory: Language Principle & Finite Automata Theory

[Infosys Springboard](#)

Build Generative AI Apps and Solutions with No-Code Tools

[Udemy](#)

Master Generative AI & Generative AI Tools (ChatGPT & more)

ACHIEVEMENTS

- Contributed to training and evaluation of AI systems, improving response quality and relevance. (Telus International Ai)
- Developed multiple real-world projects including an ML-based car price prediction model.

EDUCATION

Lovely Professional University

Bachelor of Technology Computer Science and Engineering; CGPA: 6.9

May 2027
Punjab, India

- **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

Hanfia Public School

Intermediate; Percentage: 76.8%

Mar 2023
Anantnag, J&K
