SKILLS SUMMARY

Programming languages: Python, Java, C++, C, JavaScript, SQL, HTML5, CSS3

Data Tools: Microsoft Excel, Microsoft Power BI, Tableau, Pandas, NumPy, Matplotlib, Seaborn, Hadoop, Apache Hive, Apache HBase, Apache Cassandra, MySQL

Platforms & Tools: Git, GitHub, VS Code, AutoCAD, Jupyter Notebook, Streamlit

AI & Generative AI: Prompt Engineering, Prompt Optimization, AI Assisted Development, AI Agent Development

PROJECTS

- Car Price Prediction** [GitHub](#) Dec`25
- Developed a machine learning model to predict second-hand car prices based on features such as age, mileage, and specifications.
 - Implemented a user-interactive system to collect preferences and suggest matching vehicles.
 - Applied regression techniques to predict accurate price ranges and improve decision-making.
 - Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook.
- Autocomplete Search System** [GitHub](#) Jul`24
- Built a GUI-based autocomplete system using the Trie data structure in Python.
 - Implemented efficient prefix-based search for real-time suggestions.
 - Designed a modern, responsive interface with optimized performance for scalability
 - Tech Stack:** Python, Trie Data Structure, Tkinter (GUI), Object-Oriented Programming (OOP).
- Obstruction Detector Glasses** [GitHub](#) Oct`23
- Developed assistive smart glasses for visually impaired users using Arduino and ultrasonic sensors. Detected nearby obstacles and alerted users through audio (beeping) signals.
 - Simulated and programmed the system using Proteus software.
 - Tech Stack:** Arduino Uno, Ultrasonic Sensor (HC-SR04), Buzzer, Proteus, Embedded C (Arduino IDE).

TRAINING

- Six Weeks Summer Training – Fundamentals of Data Structures** Jul`25
- Lovely Professional University [GitHub](#)
- Completed intensive training on Data Structures, Algorithm Analysis, and Complexity Analysis.
 - Implemented core data structures including Arrays, Linked Lists, Stacks, Queues, Trees, and Trie.
 - Developed a Trie-based Autocomplete System in Python using Tkinter to demonstrate efficient prefix searching.
 - Strengthened problem-solving, software design, testing, and documentation skills.
- Community Development Project (CDP) – Rural Technology & Digital Literacy** [GitHub](#) Jul`24
- Collaborated with The STEARS NGO to conduct a community outreach program at Sheikh-ul-Alam Public School (SAPS), Subhanpura.
 - Delivered interactive sessions on programming fundamentals, Artificial Intelligence, and technology awareness.
 - Organized critical-thinking activities to enhance problem-solving, teamwork, and creativity.

CERTIFICATES

- Introduction to Cloud Computing | [Coursera](#) Jun`26
- Master Generative AI and AI tools | [Udemy](#) Aug`25
- ChatGPT Made Easy: AI essentials for beginners| [Udemy](#) Jul`25
- The Bits and Bytes of Computer Networking| [Coursera](#) Dec`24
- Introduction to Hardware and Operating Systems| [Coursera](#) Nov`24

ACHIEVEMENTS

- Contributed to training and evaluation of AI systems, improving response quality and relevance.
- Developed multiple real-world projects including a Trie-based autocomplete system and ML-based car price prediction model.

EDUCATION

Lovely Professional University
Bachelor of Technology-ComputerScienceandEngineering;CGPA:6.9

Hanfia Public School
